### SKILLS

#### Technical Skills

- Software Development: **Java, PHP, C++, HTML, CSS, React.js**
- Database: **MySQL, Oracle**
- Tools & DevOps: **Docker, CI/CD (GitHub Actions), GitHub, Vercel, AI Agent CLI**
- Basic Exposure: **FastAPI, Python, Dockerhub**

Soft Skills: Team Collaboration | Adaptability | Problem Solving | Time Management

Languages: Malay (Native), English (Proficient)

### TRAINING & ACTIVITIES

|                                                                                                                                                                      |                             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| <b>Korea-ASEAN Digital Academy Malaysia Track (Ongoing)</b><br>AI-enabled full-stack development training under a Korea-ASEAN digital talent initiative (NIPA, MDEC) | <b>June 2026 - Aug 2026</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|

- Delivered Session 2, "Digital Ethics 101: Ethics in AI for Higher Education,"
- International audience India University of 500+ participants
